

### Focus on lift trucks: Trucks with lower total emissions

By Staff

**Yale Materials Handling** Corporation To meet compliance requirements established by the EPA and California, the Veracitor VX's is powered by a GM 2.4L engine with low total carbon monoxide emissions that meet standards set for 2010. The truck's two other engine options, a Mazda 2.0L and 2.2L engine, are also certified as low-emission engines. The clean engines are also fuel efficient, moving capacities ranging from 3,000 to 15,500 pounds. Both cushion and pneumatic tires are available. , 800-233-9253, [www.yale.com](http://www.yale.com).
